Since 1990, 295 residents have completed 346 residencies affiliated with the University of Pittsburgh School of Pharmacy. Growth has also been facilitated by generous grants. A Pharmacy Expansion grant in 2011 from the American Society of Health-System Pharmacists (ASHP) Foundation enabled the addition of a PGY1 program to the Western Psychiatric Institute and Clinic of UPMC. Support from the National Association of Chain Drug Stores (NACDS) Community Pharmacy Residency Expansion Project aided with the expansion of the Community Pharmacy Residency to include Giant Eagle in 2013. The breadth of our PGY2 residency programs has also increased, with newly accredited programs in transplant and internal medicine, as well as two geriatric residencies under review. Global opportunities for our residents continue to increase with over 20 residents completing rotations in Honduras, Italy, and Malawi since 2011.

The faculty and preceptors of the PITT/UPMC residency programs take great pride in the positive impact of the residency programs to the future of pharmacy as evidenced by the tremendous success of our graduates. Our graduates have made significant contributions to the literature and the practice of pharmacy. In the past two calendar years alone (2011-2012), our graduates have collectively published nearly 200 papers in the peer-reviewed literature as identified through self-report and literature searches.
